

# THE FUTURE OF UNMANNED AERIAL TRANSPORTATION IS HERE

## HYFLY H405

**Our VTOL drone is developed for efficient transportation of urgent goods in challenging environments, like cities with tight landing spaces.**

The unique tandem tilt wing concept enables wind resistant operation. Together with the over-all size of the drone, this enables the capability to take-off and land in tight spaces, like rooftops in cities. All of these characteristics make the platform the right choice for transportation of medical goods in urban environment.

### SPECIFICATIONS

Model: ..... H405  
Type: ..... Tandem Tilt Wing  
Power: ..... Batteries  
Length: ..... 1.50 m  
Wing span: ..... 1.50 m  
Height: ..... 0.5 m  
MTOM: ..... 25.0 kg  
Payload: ..... 5.0 kg  
Speed: ..... 90 km/h  
Range: ..... 30 km
